

# Industrial L3 16-Port 10/100/1000T 802.3at PoE + 4-Port 1G/2.5G SFP Managed Ethernet Switch

#### Advanced Manageable PoE Solution for Hardened Environment

PLANET IGS-6325-16P4S L3 Industrial Managed PoE+ Switch boasts 16 10/100/1000BASE-T 802.3at PoE+ ports with each capable of providing up to 36 watts of power. Featuring a robust power budget of up to 360 watts, this switch ensures abundant power for all connected devices. In addition to its PoE+ ports, it comes equipped with 4 100/1000/2500BASE-X fiber ports, housed within a rugged IP30 metal case. This design not only enhances its durability but also makes it suitable for deployment in the most challenging settings. It features intuitive yet advanced IPv6/IPv4 management interfaces, empowering users with efficient control and configuration. Its feature-rich design includes a plethora of L2/L4 switching functions, Layer 3 OSPFv2/v3 dynamic routing capability, and cutting-edge ITU-T G.8032 ERPS Ring technology, ensuring seamless connectivity and rapid self-recovery in the event of network disruptions.

#### Cybersecurity Network Solution to Minimize Security Risks

The IGS-6325-16P4S supports SSHv2, TLS and SSL protocols to provide strong protection against advanced threats. It includes a range of cybersecurity features such as DHCP Snooping, IP Source Guard, ARP Inspection Protection, 802.1x port-based and MAC-based network access control, RADIUS and TACACS+ user accounts management, SNMPv3 authentication, and so on to complement it as an all-security solution.

#### **Physical Port**

- 16 10/100/1000BASE-T Gigabit Ethernet RJ45 ports with IEEE 802.3at PoE+ Injector function
- 4 100/1000/2500BASE-X slots for SFP type auto detection
- · One RJ45 console interface for basic management and setup

#### Power over Ethernet

- Complies with IEEE 802.3at Power over Ethernet Plus/endspan PSE
- Up to 16 IEEE 802.3af/802.3at devices powered
- Supports PoE power up to 36 watts for each PoE port
- · Auto detects powered device (PD)
- · Circuit protection prevents power interference between ports
- · Remote power feeding up to 100m
- · PoE management features
  - Total PoE power budget control
  - Per port PoE function enable/disable
  - PoE admin-mode control
  - PoE port power feeding priority
  - Per PoE port power limit
  - PD classification detection
  - PoE extend mode control to support power feeding up to a distance of up to 160 meters
- · Intelligent PoE features
  - Temperature threshold control
  - PoE usage threshold control
  - PD alive check
  - PoE schedule

#### Industrial Protocol

- · Modbus TCP for real-time monitoring in the SCADA system
- IEEE 1588v2 PTP (Precision Time Protocol)

#### **Industrial Case and Installation**

- · IP30 aluminum case
- DIN-rail or wall-mount design
- 48~54V DC, redundant power with reverse polarity protection
- · Supports 6KV DC Ethernet ESD protection
- · -40 to 75 degrees C operating temperature

#### Digital Input and Digital Output

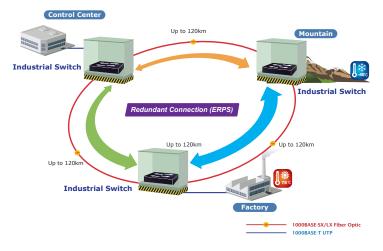

- · 2 digital input (DI)
- 2 digital output (DO)
- · Integrate sensors into auto alarm system
- · Transfer alarm to IP network via email and SNMP trap

#### Redundant Ring, Fast Recovery for Critical Network Applications

The IGS-6325-16P4S supports redundant ring technology and features strong, rapid self-recovery capability to prevent interruptions and external intrusions. It incorporates advanced ITU-T G.8032 ERPS (Ethernet Ring Protection Switching) technology, Spanning Tree Protocol (802.1s MSTP), and redundant power input system into customer's industrial automation network to enhance system reliability and uptime in harsh factory environments. In a simple Ring network, the recovery time of data link can be as fast as 10ms.

#### High Power PoE for Security and Public Service Applications

As the whole system comes with a total **360-watt** PoE budget, the IGS-6325-16P4S is designed specifically to satisfy the growing demand of higher power consuming network PDs (powered devices) such as multi-channel (802.11ac/ax/be) wireless LAN access points, PTZ (pan, tilt, zoom) speed dome network cameras and other PoE network devices.

#### Convenient and Smart ONVIF Devices with Detection Feature

PLANET has newly developed an awesome feature -- ONVIF Support -- which is specifically designed for co-operating with video IP surveillances. From the IGS-6325-16P4S GUI, clients just need one click to search and show all of the ONVIF devices via network application. In addition, clients can upload floor images to the switch series, making the deployments of surveillance and other devices easy for planning and inspection purposes. Moreover, clients can get real-time surveillance's information and online/offline status; the PoE reboot can be controlled from the GUI.

#### Layer 3 IP Routing Features

- Supports maximum 128 static routes and route summarization.
- · IPv4 dynamic routing protocol supports RIPv2 and OSPFv2.
- · IPv6 dynamic routing protocol supports OSPFv3.
- · IPv4/IPv6 hardware static routing
- · Routing interface provides per VLAN routing mode.

#### Layer 2 Features

- Prevents packet loss with back pressure (half-duplex) and IEEE 802.3x pause frame flow control (full-duplex)
- High performance of Store-and-Forward architecture, and runt/CRC filtering eliminates erroneous packets to optimize the network bandwidth
- · Storm Control support
  - Broadcast/Multicast/Unicast
- Supports VLAN
  - IEEE 802.1Q tagged VLAN
  - Up to 4K VLANs groups, out of 4094 VLAN IDs
  - Provider Bridging (VLAN Q-in-Q) support (IEEE 802.1ad)
  - Private VLAN Edge (PVE)
  - Protocol-based VLAN
  - MAC-based VLAN
  - Voice VLAN
  - GVRP (GARP VLAN Registration Protocol)
- Supports Spanning Tree Protocol
  - IEEE 802.1D Spanning Tree Protocol (STP)
  - IEEE 802.1w Rapid Spanning Tree Protocol (RSTP)
  - IEEE 802.1s Multiple Spanning Tree Protocol (MSTP), spanning tree by VLAN
  - BPDU Guard
- · Supports Link Aggregation
  - 802.3ad Link Aggregation Control Protocol (LACP)
  - Cisco ether-channel (static trunk)
  - Maximum 10 trunk groups with 20 ports per trunk group
  - Up to 8Gbps bandwidth (duplex mode)
- Provides port mirror (many-to-1)
- Port mirroring to monitor the incoming or outgoing traffic on a particular port
- · Loop protection to avoid broadcast loops
- Supports ERPS (Ethernet Ring Protection Switching)
- Compatible with Cisco Uni-directional link detection(UDLD)
  that monitors a link between two switches and blocks the
  ports on both ends of the link if the link fails at any point
  between the two devices
- · Link Layer Discovery Protocol (LLDP)

#### Intelligent Alive Check for Powered Device

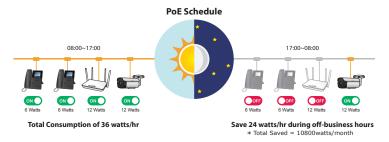

The IGS-6325-16P4S PoE Switch can be configured to monitor connected PD's status in real time via ping action. Once the PD stops working and responding, the IGS-6325-16P4S will recycle the PoE port power and bring the PD back to work. It also greatly enhances the reliability in that the PoE port will reset the PD power, thus reducing administrator's management burden.

#### **PD Alive Check**

#### PoE Schedule for Energy Saving

Under the trend of energy saving worldwide and contributing to environmental protection on the Earth, the IGS-6325-16P4S can effectively control the power supply besides its capability of giving high watts power. The built-in "PoE schedule" function helps you to enable or disable PoE power feeding for each PoE port during specified time intervals and it is a powerful function to help SMBs or enterprises save power and money.

#### Scheduled Power Recycling

The IGS-6325-16P4S allows each of the connected PoE IP cameras or PoE wireless access points to reboot at a specific time each week. Therefore, it will reduce the chance of IP camera or AP crash resulting from buffer overflow.

#### Quality of Service

- Ingress Shaper and Egress Rate Limit per port bandwidth control
- · 8 priority queues on all switch ports
- Traffic classification
- IEEE 802.1p CoS
- IP TOS/DSCP/IP precedence
- IP TCP/UDP port number
- Typical network application
- Strict priority and Weighted Round Robin (WRR) CoS policies
- · Supports QoS and In/Out bandwidth control on each port
- · Traffic-policing on the switch port
- DSCP remarking

#### Multicast

- Supports IPv4 IGMP snooping v1, v2 and v3
- Supports IPv6 MLD snooping v1 and v2
- · Querier mode support
- · IPv4 IGMP snooping port filtering
- · IPv6 MLD snooping port filtering
- MVR (Multicast VLAN Registration)

#### Security

- · Authentication
  - IEEE 802.1x port-based / MAC-based network access authentication
  - Built-in RADIUS client to co-operate with the RADIUS servers
  - TACACS+ login users access authentication
  - RADIUS / TACACS+ users access authentication
  - Guest VLAN assigns clients to a restricted VLAN with limited services
- · Access Control List
  - IP-based Access Control List (ACL)
  - MAC-based Access Control List
- · Source MAC / IP address binding
- DHCP Snooping to filter un-trusted DHCP messages
- Dynamic ARP Inspection discards ARP packets with invalid MAC address to IP address binding
- · IP Source Guard prevents IP spoofing attacks
- IP address access management to prevent unauthorized intruder

#### Management

- · IPv4 and IPv6 dual stack management
- Switch Management Interfaces
  - Console/Telnet Command Line Interface
  - Web switch management

#### SMTP/SNMP Trap Event Alert

The IGS-6325-16P4S provides event alert function to help to diagnose the abnormal device owing to whether or not there is a break of the network connection, or the rebooting response.

#### Effective Alarm Alert for Better Protection

The IGS-6325 Series supports a Fault Alarm feature which can alert the users when there is something wrong with the switches. With this ideal feature, the users would not have to waste time finding where the problem is. It will help to save time and human resource.

#### **Fault Alarm Feature**

#### Digital Input and Digital Output for External Alarm

The IGS-6325 Series supports Digital Input and Digital Output on its upper panel. This external alarm enables users to use Digital Input to detect and log external device status (such as door intrusion detector), and send event alarm to the administrators. The Digital Output could be used to alarm the administrators if the IGS-6325 Series' port shows link down, link up or power failure.

#### **Digital Output**

- SNMP v1 and v2c and v3 switch management
- SSHv2, TLSv1.2 secure access
- · SNMP Management
  - Four RMON groups (history, statistics, alarms, and events)
  - SNMP trap for interface Link Up and Link Down notification
- IPv6 IP address/NTP/DNS management
- · Built-in Trivial File Transfer Protocol (TFTP) client
- · BOOTP and DHCP for IP address assignment
- · System Maintenance
  - Firmware upload/download via HTTP/TFTP
  - Reset button for system reboot or reset to factory default
  - Dual Images
- DHCP Functions:
  - DHCP Relay
  - DHCP Option 82
  - DHCP Server
- · User Privilege levels control
- · Network Time Protocol (NTP)
- · Network Diagnositc
  - SFP-DDM (Digital Diagnostic Monitor)
  - ICMPv6/ICMPv4 Remote Ping
  - Cable diagnostic technology provides the mechanism to detect and report potential cabling issues
- PLANET NMS System and Smart Discovery Utility for deployment management
- · SMTP/Syslog remote alarm
- · System Log
- Provides ONVIF for co-operating with PLANET video IP surveillances

#### Layer 3 Routing Support

The IGS-6325 Series enables the administrator to conveniently boost network efficiency by configuring Layer 3 IPv4/IPv6 VLAN static routing manually, the RIP (Routing Information Protocol) or OSPF (Open Shortest Path First) settings automatically.

The RIP can employ the hop count as a routing metric and prevent routing loops by implementing a limit on the number of hops allowed in a path from the source to a destination.

The OSPF is an interior dynamic routing protocol for autonomous system based on link state. The protocol creates a database for link state by exchanging link states among Layer 3 switches, and then uses the Shortest Path First algorithm to generate a route table based on that database.

#### Robust Layer 2 Features

The IGS-6325 Series can be programmed for advanced switch management functions such as dynamic port link aggregation, Q-in-Q VLAN, private VLAN, Rapid Spanning Tree Protocol, Layer 2 to Layer 4 QoS, bandwidth control and IGMP snooping. The IGS-6325 Series provides 802.1Q tagged VLAN, and the VLAN groups allowed will be maximally up to 255. Via aggregation of supporting ports, the IGS-6325 Series allows the operation of a high-speed trunk combining multiple ports. It enables a maximum of up to 6 trunk groups with 4 ports per trunk group, and supports fail-over as well.

#### **Efficient Management**

For efficient management, the IGS-6325 Series is equipped with console, Web and SNMP management interfaces.

- With the built-in **Web-based** management interface, the IGS-6325 Series offers an easy-to-use, platform-independent management and configuration facility.
- For text-based management, it can be accessed via Telnet and the console port.
- For standard-based monitor and management software, it offers **SNMPv3** connection which encrypts the packet content at each session for secure remote management.

#### Powerful Security

The IGS-6325 Series offers comprehensive Layer 2 to Layer 4 Access Control List (ACL) for enforcing security to the edge. It can be used to restrict network access by denying packets based on source and destination IP address, TCP/UDP ports or defined typical network applications. Its protection mechanism also comprises 802.1x Port-based and MAC-based user and device authentication. With the private VLAN function, communication between edge ports can be prevented to ensure user privacy. The network administrators can now construct highly-secure corporate networks with considerably less time and effort than before.

#### Modbus TCP Provides Flexible Network Connectivity for Factory Automation

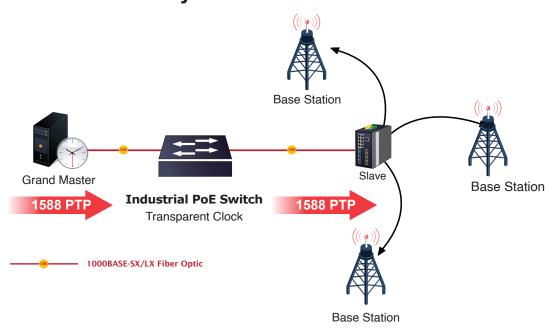

With the supported **Modbus TCP/IP** protocol, the IGS-6325 Series can easily integrate with **SCADA** systems, **HMI** systems and other data acquisition systems in factory floors. It enables administrators to remotely monitor the industrial Ethernet switch's **operating information**, **port information** and **communication status**, thus easily achieving enhanced monitoring and maintenance of the entire factory.

#### 1588 Time Protocol for Industrial Computing Networks

The IGS-6325 Series is ideal for telecom and Carrier Ethernet applications, supporting MEF service delivery and timing over packet solutions for IEEE 1588 and synchronous Ethernet.

## **Time Synchronization in Network**

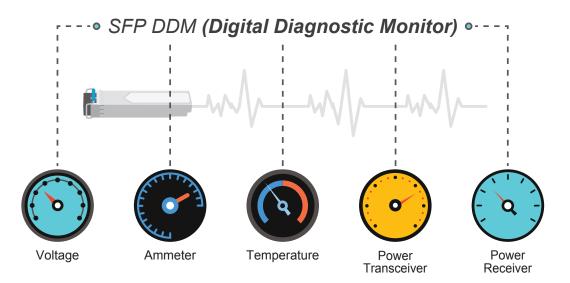

#### Flexibility and Extension Solution

The additional four mini-GBIC slots built in the IGS-6325-16P4S support triple-speed 100/1000/2500BASE-X SFP (small form-factor pluggable) fiber-optic modules, meaning the administrator now can flexibly choose the suitable SFP transceiver according to not only the transmission distance but also the transmission speed required. The distance can be extended from 300 meters to 2 kilometers (multi-mode fiber) and 10/20/40/60/80/120 kilometers (single-mode fiber or WDM fiber). They are well suited for applications to uplink to backbone switch and monitoring center in long distance.

#### Intelligent SFP Diagnosis Mechanism

The IGS-6325 Series supports SFP-**DDM** (Digital Diagnostic Monitor) function that greatly helps network administrator to easily monitor real-time parameters of the SFP, such as optical output power, optical input power, temperature, laser bias current, and transceiver supply voltage.

#### Remote Management Solution

PLANET's **Universal Network Management System (UNI-NMS)** and **CloudViewerPro app** support IT staff by remotely managing all network devices and monitoring PDs' operational statuses. Thus, they're designed for both the enterprises and industries where deployments of PDs can be as remote as possible, without having to go to the actual location once a bug or faulty condition is found. With the UNI-NMS, NMSViewerPro app or CloudViewerPro app, all kinds of businesses can now be speedily and efficiently managed from one platform.

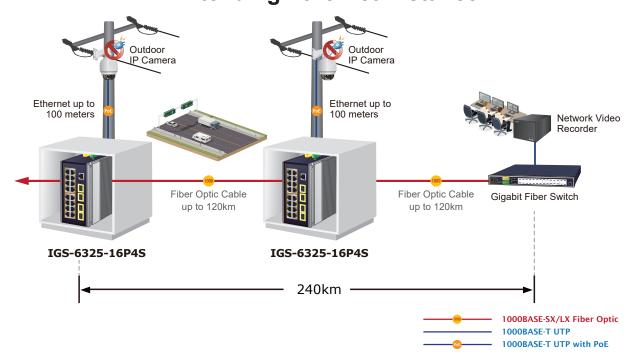

## **Applications**

#### Industrial Area Department/Workgroup PoE Switch

Providing up to 16 PoE+, in-line power interfaces, the IGS-6325-16P4S can easily build a power centrally controlled for IP phone system, IP camera system, or wireless AP group for Industrial network. For instance, 16 PoE IP cameras or wireless access points can be easily installed around the corner in the industrial environment for surveillance demands or for a wireless roaming network. Without the power-socket limitation, the IGS-6325-16P4S makes the installation of IP cameras or wireless AP easier and more efficient.

# **Extending Ethernet Distance**

# Specifications

•			
Product	IGS-6325-16P4S		
Hardware Specifications			
Copper Ports	16 10/100/1000BASE-T RJ45 auto-MDI/MDI-X ports		
SFP Slots	4 1000BASE-SX/LX/BX SFP interfaces (Port-17 to Port-20)		
SFF SIULS	Compatible with 100BASE-FX and 2500BASE-X SFP		
PoE Injector Port	16 ports with 802.3at/af PoE injector function (Port-1 to Port-16)		
Console	1 x RJ45-to-RS232 serial port (115200, 8, N, 1)		
Reset Button	< 5 sec: System reboot		
Reset Button	> 5 sec: Factory default		
ESD Protection	6KV DC		
Enclosure	IP30 aluminum case		
Installation	DIN-rail kit and wall-mount kit		
Connector	Removable 6-pin terminal block for power input		
	Pin 1/2 for Power 1, Pin 3/4 for fault alarm, Pin 5/6 for Power 2		
Connector	Removable 6-pin terminal block for DI/DO interface		
	Pin 1/2 for DI 1 & 2, Pin 3/4 for DO 1 & 2, Pin 5/6 for GND		
Alarm	One relay output for power failure. Alarm relay current carry ability: 1A @ 24V DC		
	2 digital input (DI)		
Digital Input	Level 0: -24V~2.1V (±0.1V)		
Digital Input	Level 1: 2.1V~24V (±0.1V)		
	Input load to 24V DC, 10mA max.		
Digital Output	2 digital output (DO)		
Digital Output	Open collector to 24V DC, 100mA max.		
Dimensions (W x D x H)	76 x 135 x 152 mm		
Weight	1530g		
Power Requirements	Dual 48~54V DC (>51V DC for PoE+ output recommended)		
Power Consumption	Max. 17.4 watts/59.334BTU (Power on without any connection)		
Fower Consumption	Max. 394 watts/1343.54BTU (Full loading with PoE function)		
LED Indicator	System: - Power 1 (Green) - Power 2 (Green) - Fault Alarm (Red) - Ring (Green) - Ring Owner (Green) - DIDO (Red) Per 10/100/1000T RJ45 PoE+ Ports: - PoE-in-Use (Amber) - LNK/ACT (Green) Per SFP Interface: - 100 LNK/ACT (Amber) - 1G/2.5G LNK/ACT (Green)		
Switching Specifications			
Switch Architecture	Store-and-Forward		
Switch Fabric	52Gbps/non-blocking		
Throughput (packet per second)	38.6Mpps@ 64 bytes packet		
Address Table	16K entries, automatic source address learning and aging		
Shared Data Buffer	32Mbits		
Jumbo Frame	10K bytes		
	IEEE 802.3x pause frame for full duplex		
Flow Control	Back pressure for half duplex		
Power Over Ethernet			
PoE Standard	IEEE 802.3at Power over Ethernet Plus/PSE		
PoE Power Supply Type	End-span		
	IEEE 802.3af Standard		
PoE Power Output	- Per port 48V~51V DC, max. 15.4 watts IEEE 802.3at Standard - Per port 51V~54V DC, max. 36 watts		
Power Pin Assignment	1/2(+), 3/6(-)		
	Signal Power input		
	- 240W maximum (depending on power input)		
PoE Power Budget	Dual Power input		
	- 360W maximum (depending on power input)		
	*Dual power input must be the same as DC voltage, like dual 54V		

Max. Number of Class 2 PDs	16		
Max. Number of Class 3 PDs	16		
Max. Number of Class 4 PDs	10		
PoE Management Functions			
Enhanced PoE Mode	Standard/Legacy/Force		
	PD Alive Check		
	Scheduled Power Recycling		
PoE Management	PoE Schedule		
	PoE Usage Monitoring		
	PoE Extension		
Active PoE Device Live Detection	Yes		
PoE Power Recycling	Yes, daily or predefined schedule		
PoE Schedule	4 schedule profiles		
PoE Extend Mode	Yes, max. up to 160 meters		
Layer 3 Function			
IP Interfaces	Max. 128 VLAN interfaces		
Routing Table	Max. 128 routing entries		
	Max. 4K H/W routing table entries		
	IPv4 hardware static routing		
	IPv6 hardware static routing		
Routing Protocols	IPv4 RIPv2		
	IPv4 OSPFv2 dynamic routing		
	IPv6 OSPFv3 dynamic routing		
Layer 2 Function			
	Port disable/enable		
Port Configuration	Auto-negotiation 10/100/1000Mbps full and half duplex mode selection		
	Flow control disable/enable		
	Power saving mode control		
Port Status	Display each port's speed duplex mode, link status, flow control status, auto negotiation status, trunk status		
	TX / RX / Both		
Port Mirroring	Many-to-1 monitor		
	RMirror – Remote Switched Port Analyzer (Cisco RSPAN)		
	Supports up to 5 sessions		
	IEEE 802.1Q tag-based VLAN, up to 255 VLAN groups		
	IEEE 802.1ad Q-in-Q tunneling		
	Private VLAN Edge (PVE)		
	MAC-based VLAN		
VLAN	Protocol-based VLAN		
	Voice VLAN		
	MVR (Multicast VLAN Registration)		
	GVRP (GARP VLAN Registration Protocol)		
	Up to 4K VLAN groups, out of 4094 VLAN IDs		
	IEEE 802.3ad LACP/static trunk		
Link Aggregation	Supports		
	- Static Port Trucking, (20 ports/10 groups max.)		
	- Dynamic LACP-(20 ports/10 groups max.)		
	IEEE 802.1D Spanning Tree Protocol		
Spanning Tree Protocol	IEEE 802.1w Rapid Spanning Tree Protocol		
5	IEEE 802.1s Multiple Spanning Tree Protocol		
	BPDU Guard		
	IPv4 IGMP (v1/v2/v3) snooping, up to 255 multicast groups		
IGMP Snooping	IPv4 IGMP querier mode support		
.c.m c.noop.i.g	IPv4 IGMP Snooping port filtering		
	Multicast VLAN Registration		
MLD Snooping	IPv6 MLD (v1/v2) snooping, up to 255 multicast groups		
	IPv6 MLD querier mode support		
	Per port bandwidth control		
Bandwidth Control	Ingress: 500Kb~1000Mbps		
	Egress: 500Kb~1000Mbps		
RING	Support ERPS, complies with ITU-T G.8032v1 and v2		
	Recovery time < 50ms		

	IEEE 1588v2 PTP(Precision Time Protocol)
Synchronization	- Peer-to-peer transparent clock
	- End-to-end transparent clock
	Traffic classification based, strict priority and WRR
	8-level priority for switching
QoS	- Port number
QUS	- 802.1p priority
	- 802.1Q VLAN tag
	- DSCP/TOS field in IP packet
Security Functions	
	IP-based ACL/MAC-based ACL
	ACL based on:
	- MAC Address
	- IP Address
Access Control List	- Ethertype
Access Control List	- Protocol Type
	- VLAN ID
	- DSCP
	- 802.1p Priority
	Up to 512 entries
	Port security
	IP source guard, up to 512 entries
Security	Dynamic ARP inspection, up to 1K entries
	Command line authority control based on user level
	Static MAC address, up to 64 entries
AAA	RADIUS client
	TACACS+ client
	IEEE 802.1x port-based network access control
Network Access Control	MAC-based authentication
	Local/RADIUS authentication
Management	
Pagia Managament Interfaces	Console; Telnet; Web browser; SNMP v1, v2c
Basic Management Interfaces	
Secure Management Interfaces	SSHv2, TLSv1.2, SNMP v3

## **Dimensions**

## **Ordering Information**

IGS-6325-16P4S Industrial L3 16-Port 10/100/1000T 802.3at PoE + 4-Port 1G/2.5G SFP Managed Ethernet Switch

### **Related Products**

IGS-6325-16T4X	Industrial L3 16-Port 10/100/1000BASE-T + 4-Port 10GBASE-X SFP+ Managed Switch
IGS-6325-16T4S	Industrial L3 16-Port 10/100/1000T + 4-Port 1G/2.5G SFP Managed Ethernet Switch
IGS-20160HPT	Industrial L3 16-Port 10/100/1000T 802.3at PoE + 2-Port 10/100/1000T + 2-Port 1G/2.5G SFP
	Managed Ethernet Switch

## **Available Modules**

MGB2G-Series Transceiver	2500BASE-SX/LX Transceiver
MGB-Series Transceiver	1000BASE-SX/LX Transceiver

# **Related Power Supply**

PWR-480-48 48V, 480W DIN-rail Power Supply (NDR-480-48, adjustable 48-56V DC Output)
