

# RO-4X REVERSE OSMOSIS SYSTEM

RO-4X series (RO-44, 43 and 42) standard reverse osmosis system covers capacities between 0,5-1,6 m<sup>3</sup>/h when used for demineralization of normal potable water (e.g. for turbine or steam plant use) and 0,4-0,8m<sup>3</sup>/h when used for desalination of sea water.

## Features:

- ✓ Touchscreen with easy to use and informative user interface
- ✓ Stainless steel frame and e-cabinet
- ✓ All electric instrumentation to enable optimal operation efficiency
- ✓ 5 µm prefilter
- ✓ Possibility of integration to other systems (e.g. plant or process monitoring software) and remote operations.
